## Roll Laminators

Roll Laminators use comparatively inexpensive film but the machines cost significantly more. However, they pay for themselves in speed and volume using continuous feed. They will accept a much wider variety of material sizes.

### MiniKote 27" Roll Laminator

The Laminex MiniKote is strong, fast, and reliable. An upgrade machine for the teachers workroom. [\[Product Details...\]](#)

### SuperKote 32" Roll Laminator (25" & 42" Available)

The Laminex SuperKote is a well built wide format laminator for schools or media centers. This unit will laminate the posters and banners that the smaller 25" machines won't handle. [\[Product Details...\]](#)

### Workhorse 25" Roll Laminator

The Ledco Workhorse HD-25 is the strongest and fastest production laminator that we have ever offered. Up to 25 feet per minute, up to 1/2" thick materials. [\[Product Details...\]](#)
