## Cold Laminators

Cold Laminators don't use any heat or electricity. Instead, an adhesive material is used. Operator simply loads a cartridge of "film" and then feeds the item to be laminated into machine while turning the crank.

### **Xyron 1250 12" Cold Laminator**

The Xyron 1250 is an easy-to-use laminator that instantly applies adhesive, laminates, or does both at the same time without heat or electricity. Simply feed in an item, turn the handle, and trim. No mess, no waiting. Drop-in cartridges allow user to quickly [\[Product Details...\]](#)

### **Xyron 2500 25" Cold Laminator**

The Xyron 2500 cold laminator applies adhesive and laminate items up to 25" wide. Great for protection and mounting posters, signs, and maps. Works without heat, electricity, or batteries. No spray, fumes or mess. Simply change roll sets to change applica [\[Product Details...\]](#)
