Computerized Time Clocks

Time Clocks Time clocks collect employee time and attendance data. Our data collection devices fit your unique work environment, and they reduce the time and cost of data collection. Time clocks simplify punching In and Out and provide additional functions for supervisors and employees. These time clocks work seamlessly with Attendance Enterprise.

No matter which data collection method(s) you choose, you can always find the right time clock for your organization:

Employee Online Time Sheets

Employee Online Time Sheets Employee online time sheets: * Efficiently collect information from employees with access to a PC * Reduce requests for archived time and attendance information by providing historical data to employees online [Product Details...]

Hand Punch

Biometric Hand Readers Biometric hand reader technology makes buddy punching impossible. Advanced biometric technology stores the unique geometry of each employeeâ€™s hand in a template. This template is later used to identify that employee. Employees no [Product Details...]
