MiniKote 27" Roll Laminator

Digital temperature control and temperature presets make this machine easy to set up and use.

For schools and media centers, a built in footage counter lets you track film use by class or project. A key lock protects the machine and prevents unauthorized or after hours use.

External temperature adjust.

Easy to use tension controls and preset roller pressure ensure smooth even lamination without wrinkle or curl.

Cooling fans give you the ability to run film up to 5 mil for posters and important projects
